

# Blanco Management Console

Centralized, Secure Point of Control for Report Collection and Data Erasure Verification

## Why Blanco

Blanco is the industry standard in data erasure and mobile device diagnostics software. Blanco data erasure solutions provide thousands of organizations with the tools they need to add an additional layer of security to their endpoint security policies through secure erasure of IT assets. All erasures are verified and certified through a tamper-proof audit trail.

Blanco data erasure solutions have been tested, certified, approved and recommended by 15+ governing bodies and leading organizations around the world. No other data erasure software can boast this level of compliance with the rigorous requirements set by government agencies, legal authorities and independent testing laboratories.

## Prove, enforce and manage your security and compliance policies with Blanco Management Console.

Blanco Management Console provides data erasure management access to internal users, administrators and support staff. Within this centralized and secure point of control, you can view all data erasure licenses, create and modify users and groups, view operator throughput, monitor erasure activities and collect tamper-proof reports to prove data erasure and regulation compliance. Additionally, your customers can feel secure that no personally identifiable information (PII) is stored as part of this process.

## Key Benefits

### Safely Monitor Data Erasure Activities and Report Precisely on Results

- Provide insight into staff performance with an operator throughput widget that can be filtered by product, group or date range.
- Store, share or search for reports in a tamper-proof environment to prove you've met compliance with all local, national and global regulations, including PCI DSS, HIPAA and GDPR.

### Streamline Internal Processes and Strengthen Transparency

- Integrate data erasure into your existing asset management infrastructure to automate workflows and simplify compliance.
- Identify performance issues across all of your assets and quickly access reports to solve any potential production shortcomings.

### Prove Data Sanitization Across the Entire Data Lifecycle

- Easily scale data protection policies across physical, logical and virtual environments and optimize operations with erasure statistics and business intelligence dashboards.
- Centralize control and report on all erasure activities with 100% certified and tamper-proof reports.

## Technical Specifications

CENTRALIZED PROCESS MANAGEMENT		ACCESS CONTROL & USER MANAGEMENT	
<ul style="list-style-type: none"> <li>• Web service interfaces (REST API) for seamless integration with existing AMS/ERP systems</li> <li>• Full automation requiring minimum user interaction</li> <li>• AD integration for user authentication</li> <li>• Erasure statistics to identify performance issues across all assets</li> <li>• SAML/SSO authentication (single sign-on) support</li> <li>• Azure authentication support</li> </ul>		<ul style="list-style-type: none"> <li>• Extensive database support</li> <li>• Built-in user level such as Admin, Manager and User</li> <li>• User role management including granular control over erasure and reporting authorities</li> <li>• Built-in erasure license management</li> <li>• Groups and subgroups can also be created for report sharing and license assignment</li> <li>• Operator throughput widget allows greater insight into staff performance</li> </ul>	
TECHNICAL SPECIFICATIONS		REPORTING	
<ul style="list-style-type: none"> <li>• Full traceability with detailed information including action logs for each individual report</li> <li>• Reports available in CSV, PDF and XML formats</li> <li>• Fast and user friendly report searching (including search by date)</li> <li>• Add user-created reports for non-functioning assets</li> <li>• Automatic report fetching with live management</li> <li>• Offers high availability support</li> </ul>		<ul style="list-style-type: none"> <li>• Comprehensive data erasure reports and statistics</li> <li>• Full hardware and software details recorded</li> <li>• Easy report importing, exporting, editing, emailing and validating</li> <li>• Back up incoming reports directly to local filesystem</li> <li>• Allows for archiving of reports</li> <li>• Customizable reports, with the option to add company logo</li> </ul>	
MINIMUM HARDWARE REQUIREMENTS	AUDITING	LANGUAGE SUPPORT	
<ul style="list-style-type: none"> <li>• Dual-core processor or better</li> <li>• 4 GB RAM or better</li> <li>• Network interface card</li> <li>• Display</li> <li>• Keyboard and mouse</li> <li>• Free USB port</li> <li>• Java Runtime Environment (OS independent)</li> </ul>	<ul style="list-style-type: none"> <li>• Tamper-proof reporting with secure digital signatures</li> <li>• Comprehensive asset and chain of custody tracking</li> <li>• Full transparency of the erasure process</li> </ul>	<ul style="list-style-type: none"> <li>• English</li> <li>• French</li> <li>• German</li> <li>• Japanese</li> <li>• Korean</li> <li>• Portuguese</li> <li>• Chinese</li> <li>• Spanish</li> </ul> <p>Please ask your Blanco sales representative for details.</p>
