

WipeDrive Mobile Solutions

WipeDrive Mobile allows corporations and government entities to securely and permanently erase all data from iOS devices and then re-load the most recent version of iOS automatically. Devices erased with WipeDrive Mobile end up in a like-new state with all sensitive data gone. Avoid data leaking during second life usage, avoid locked phone issue, and comply with media sanitization standards. (Verify, Diagnostics, Eraser).

Efficient Workflow

- Verify, Diagnostics and Erasing can be performed for multiple devices at the same time.
- Reporting integration and label printing
- Volume UI supports connecting as many devices as PC supports – USB connections
- Diagnostics and Erasing profiles can be defined locally
- Timed downloads for iOS flash files
- Multiple Language support

WipeDrive Mobile Services Volume performs efficient workflow for the devices, by first performing quick verification of the device, then comprehensive diagnostics testing and finally performs secure erasing of the device. Volume supports connecting as many devices as PC supports.

All data collected during verification, diagnostics and erasure is available in WipeDrive Mobile Reporting database.

Verify
